

I was attacked alongside my 12 year old son with a chemical/biological gas and a failed explosion attamept in my car by several agencies invited by a detective Zeke Morse, RPD under a bogus child rescue operation or emergency response in association with the department of health and hùman services in Raleigh North Carolina on August 17 2023 shortly after leaving the triangle town center mall on the busy capital blvd in broad day light with a child that has been approached by them.

manipulated and
blackmailed into
participating, not knowing he
was about to get killed too.
Someone posed as a peer
online and shortly he started
behaving strange even left
his dear iPhone for someone
to pick up and gain access to
all connected accounts, I
traced the phone to a textile
factory by the NC state
university on Hillsborough
street where it stayed for

a few days before it completely disappeared. My son even insisted on having my phone lock screen code during the attack, looking at the analytics later, it seems that he was about to unknowingly blow us up thinking he is stopping the gas.

I turned the phone off and dropped it between the seat and console, and he started panicking and screaming, "I don't want to die."

I'm also being blocked from getting any legal help I have been trying for more than a year, even abroad still blocked and on a filter list and api level blocking that is made possible by Google and satellite Stingray like surveillance in addition to T-Mobile.

Google firebase, Apple webkit and Apple quicklook extension ui. this could happen to anyone when you consent to Google Play store you also consent to Google instant apps which are apps installed remotely like the ones on my phone Operation Chimera, Gearhead and Children Chimera which looks like parental control apps to sync with a trusted contact which is who ever is listening.

This is an attack against minorities that is supported by cartloads of legal framework from environmental and agricultural to child consent to medical treatments, single parent custody changes, changes to mandatory commitment, community participation, religious groups and local churches, ammendments to mental health

procedures, sexual and gender expression, rural disparities, substance use, socioeconomic and medical procedures to support and legitimize each crime committed with underlying language about diversity equity and inclusion! Some Vitos and house bills passed days even hours before of the attack on August 17 2023. There are also incentives to all participating organizations, profit and non profit in a addition to individuals and families.

The more agencies and education institutions get involved, the easier it gets to dilute accountability. I also have to mention their invitation to the toxicology advisory board and their adhoc team who promotes using minorities instead of animals in the region, after all the dying

dear population, fish
behaving strange and dying
now it's time to use healthy
humans injected or gassed
with toxic materials and
deadly diseases including
children in public schools,
check their alternative
testing methods webinars
NAMS.

The nomination for this
attack is mostly personal and
coming from the rolesville
elementary school any child
they don't like gets enrolled
in ECATS Programs after
making the child misrable
by allowing systematic

bullying my child was hit many times in the bus, gym and school hallways and everyone turns a blind eye until once he hit back and he and I unknowingly became under surveillance with sticky software delivered through Chromebook your child brings home it installs the necessary framework for what to come next and to watch the behavior of all

connected devices and individuals in your home. A counselor from social services and the school principal, and most importantly, a Brandon Moore from NCATS Kentucky who sent my 12 year old a video game in the mail.

After we survived the attack and before, I got time to talk to my son. 5 police cars from the Rolesville police department came and took him to his estranged mother because he knew something. And the next morning, they

came and put me in handcuffs and took me into mandatory commitment. They said my uncle has filed a petition that I am in danger to myself and others. I do not even have an uncle. I was stripped naked, humiliated, and administered a Foley catheter that caused me permanent damage.

There are mentions to Merck and Eli Lilly clinical trials for infectious diseases like covid and HIV blood transfusion proposals. also a proposal for growth implants which are meant for cattle, but I think the process was sterilization process, and they kept me 5 days. After I got out of the hospital, I got out of my phone, which they took from me. Send me messages. They turned out to be cloud to DM messages from Google firebase. Cloud all abusive guided and/or assisted suicide. There is a mention of

implants meant to
pedophiles surveillance. True
or not, they turn your
devices into tools for
psychological and mental
abuse in order to discredit
you, but I have all the
technical analytics to prove
every word I said. all this
appears in the federal
register under unrelated
events like waste water

treatment and emergency responses and other activities when read with a critical eye it will match especially FY2023, CY2023 and organ acquisition policies and proposals. Some really scary stuff.

I hope you can help me with this or at least forward it to the FBI in Washington because I'm blocked somehow from reaching any of those agencies. The blocking uses cloud services like Acamai, Amazon, stack overflow, Google cloud, Google api, firebase, creative

commons, Apple and
airurbanship. All these
platforms and companies
give ultimate access to your
devices and even inject and
edit content once they get
paid. There is no such thing
as privacy the manifests
shows how they bypass all
that and get authentication
through FIDO Alliance who
will temporarily change
privacy policy to

China along with owners information to grant access.

After many threats, break ins and the destruction of my vehicle, I left the country to Jordan thinking I'll be able to send or receive emails or social media not sure if I'm reaching, I have to also mention this operation is in federal register under some regulatory incoherent language.

In short, they take a single parent who suffered the

abuse of social services and the public school system and simply paint him into a pedophile or a mentally unstable person or an addict and the system will do the rest after offering them on the market for deadly clinical trials, psychological research and more, they will also pay your astranged family and

promise them handsome
rewards and compensation
postmortem.

Sincerely,
Rami Al Nasa
